Mine Spec Light Vehicles

Wagons, Utes and more

At New Rental, we specialise in providing high-quality light vehicle rentals, focusing on Toyota models such as the Hilux, Land Cruiser, and Prado. Our fleet includes both single and dual cab options, wagons and passenger vehicles, ensuring we meet the diverse needs of our clients across various industries. Each vehicle can be customized to your specifications, available as tray backs, canopies and more.

We understand that every project has unique requirements, which is why we offer flexibility in our configurations. Whether it's a robust vehicle for rugged terrains or efficient options for urban environments, we can create the perfect combination to suit your operational demands. Our commitment to quality and versatility ensures that you receive the right vehicle to enhance productivity and ensure smooth operations in the field.

Specialty Light Vehicles

Meeting your exact requirements

Our specialty vehicle fleet includes Bomb Utes, Ambulances, Fire Utes, Crane Utes, and more, each equipped to serve critical functions in challenging environments.

Each vehicle is designed to code and built to the highest standards. Our specialty vehicles are built by the best in the business and will work in the toughest environments. Each specialty vehicle can be customised further based on your operational needs, ensuring that we deliver precise solutions whether for safety, medical assistance, or heavy lifting.

Mine Spec Buses

2WD & 4WD versions available

New Rental offers a fleet of reliable transport solutions, featuring Toyota HiAce and Commuter buses available in both HiLift 4x4 and standard configurations. Each bus is designed to meet industry standards.

Our HiLift 4x4 buses are specifically engineered to navigate challenging terrains, making them ideal for remote locations and rugged environments. The standard models offer versatile solutions for urban transport needs, accommodating a range of passenger capacities for both short and long-distance travel.

Each bus can be customised based on your operational requirements, allowing us to provide tailored solutions for group transport, events, or workforce mobility.

Mine Spec Coaches

Isuzu Chasis 4WD Coaches

New Rental features a fleet of robust 4x4 coaches built on the Isuzu FTS 139-240 Auto 4WD chassis, specifically designed for rugged conditions and efficient team movements. With seating options available for 30, 34, or 38 passengers, these coaches offer ample capacity for transporting large crews safely and comfortably to their destinations. Engineered to tackle challenging terrains, these coaches ensure that your team can navigate various environments securely and reliably.

Each coach is tailored to meet operational needs, making it an ideal solution for remote work sites, off-grid tours and more.

Mine Spec Trucks

Built for durability & compliance

New Rental offers fully equipped Service Trucks for on-site maintenance and refuelling in demanding mining and heavy-duty environments. Our trucks are built to industry standards, ensuring maximum efficiency, compliance, and reliability to keep operations running with minimal downtime.

The New Rental truck fleet also includes water carts built for efficient dust suppression and water transport in mining, civil, and heavy-duty applications. Designed for durability and compliance, our trucks feature high-capacity tanks, powerful pumps, and customisable spray configurations to meet site-specific needs.

Customisable & Compliant

Built to your exact requirements

Our mine-spec vehicles are designed to meet stringent industry standards and regulatory requirements, ensuring safety, compliance, and operational efficiency in the mining sector. Each vehicle in our fleet is expertly equipped with a comprehensive range of safety features tailored to the unique challenges of the mining environment. These features include a Vehicle Safety Tracking System for real-time monitoring, fire extinguishers for immediate emergency response, and reflective tape to enhance visibility. Additionally, our vehicles are outfitted with a mine light bar for low-light conditions, Vehicle Sign ID Plates for identification, and high visibility flags to increase on-site awareness.

To further enhance safety, our mine-spec vehicles include a reverse beeper to alert personnel of reversing vehicles, an External Roll Over Protection System (ROPS) to protect occupants in the event of a rollover, and wheel nut indicators to ensure proper fastening.

Safety features also incorporate wheel chocks for stability on uneven terrain, motor isolators for enhanced security when the vehicle is not in use, and handbrake alarms to indicate when the handbrake is not engaged. Further safety measures consist of a safety beacon to indicate vehicle presence, safety triangles for additional warnings, and driving lights that activate on ignition for immediate visibility.

Our vehicles are also equipped with canvas seat covers for interior protection, steel bullbars for enhanced durability, trailer harnesses for towing capabilities, and UHF radios (80 Channel) alongside long-range antennas for reliable communication in challenging environments. With these comprehensive safety measures in place, our mine-spec vehicles are tailored to withstand the rigorous demands of mining operations. New Rental is committed to providing solutions that prioritize safety and operational success in the field.

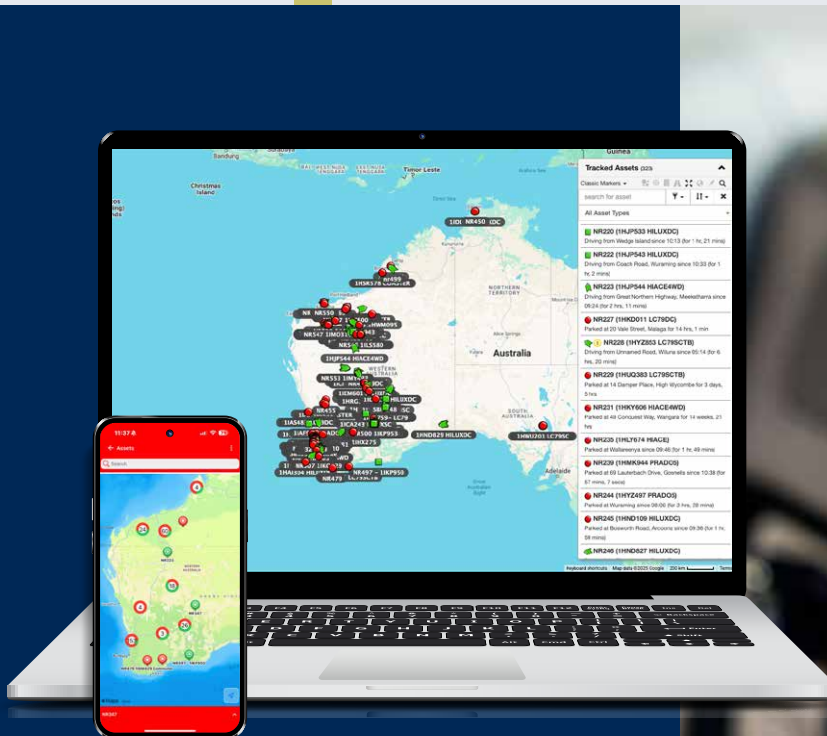

Safety & Tracking

Keeping health & safety a priority

We prioritise safety, efficiency, and accountability in all our operations. To enhance these aspects, we utilize MAC TRACK for our vehicle tracking system. This advanced technology enables real-time monitoring of our fleet, providing critical data on vehicle location, speed, and operational status.

MAC TRACK allows us to maintain comprehensive oversight of our vehicles, ensuring they are being utilized effectively and safely. The system provides instant alerts for any irregularities, such as unauthorized movements or deviations from established routes, allowing us to respond promptly to any issues that may arise. Additionally, the tracking capabilities support our commitment to client transparency, as we can provide real-time updates on vehicle availability and estimated arrival times for scheduled services.

By integrating MAC TRACK into your operations, we not only enhance the safety and security of our fleet but also improve overall efficiency, enabling us to better serve our clients in a timely and reliable manner.
